Study in progress

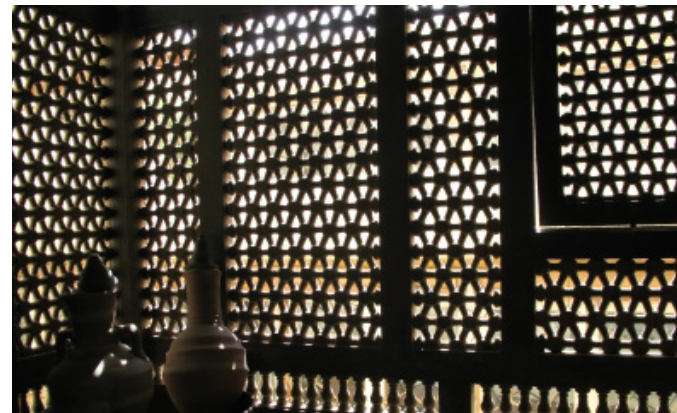

Solar and Wind energy map in Morocco

Internal patio that participated in inside freshness

The environmental study will give birth to a tutorial for local :

- Designers;
- Urban planners;
- Consultants ;
- Providers ;
- Public institutions ;

Moucharaby, wooden lattice : local solar protection

Earth and "Bejmat" construction materials

The objective is to study the local Moroccan environment and to propose solutions for sustainable design for public buildings in Morocco. The study will lead to a tutorial that will help local institutions making environmentally oriented decisions.
